ULTRASOUND REPORT

Type of Scan	:	Transvaginal Ultrasound
Uterus	:	Normal size and shape
Gestational Sac	:	Single, well-defined sac seen in the uterus
Yolk Sac	:	Not clearly visible at 4 weeks (may appear later)
Fetal Pole	:	Not visible at this stage (usually seen after 5–6 weeks)
Other Findings	:	No abnormalities detected. Both ovaries appear normal.

Gestational sac seen (approx. 4 weeks)

INTERPRETATION & PLAN

- Findings are consistent with an early intrauterine pregnancy of approximately 4 weeks.
- Fetal pole and heartbeat are not yet visible, which is normal at this stage.
- Repeat ultrasound is recommended in 1–2 weeks to confirm viability and see fetal development.
- Continue prenatal vitamins and follow up with your doctor.

Remarks: This report is based on the current findings and may change as the pregnancy progresses. Please consult your gynecologist for personalized advice and follow-up.
